Ground Water Survey Directorate

A Deep bore hole was drilled 140 mtrs. depth, and Logged depth 139 mtrs. at above bore hole using GSI Well Logger on 21-Dec-2021. On the request of M/S PNC-SML-JV, Badanu, a Geophysical well Logging is conduct at above bore hole using GSI Well Logger on 21-Dec-2021. Logging Parameters - Self Potential, shot normal (N-16), Long Normal (N-64), Lateral. Details of major aquifer formations explored from logging of bore hole combined with the study of Strata Chart prepared from drill cuttings are given in the following table:-
