# Geophysical Well Logging Report

Ref No - 24

Date 22/09/2021

Site Location :- Hasanpur Billoh Noorpur

Distt :- Bijnour

Drilling Depth :- 157 MBGL

Logged Depth :- 157 MBGL

Date of Logging :- 22/09/2021

Types of Log :- S.P & Resistivity

Logger used :- IGIS

Details of Major aquifer formations explored from logging of borehole combined with the study of strata-chart prepared from drill cuttings are given in following table .

| Depth Range<br>From M.B.G.L<br>. | Up to Depth<br>Range<br>M.B.G.L. | Thickness<br>Mtrs. | Inferred Litho logy | Quality of G.W. |
|----------------------------------|----------------------------------|--------------------|---------------------|-----------------|
| 50                               | 62                               | 12                 | Medium Sand         | Good            |
| 80                               | 90                               | 10                 | Medium Sand         | Good            |
| 110                              | 125                              | 15                 | Medium Sand         | Good            |
| 135                              | 150                              | 15                 | Medium Sand         | Good            |
