REPORT ON GEO-PHYSICAL RESISTIVITY LOGGING OF BOREHOLE

A deep borehole was drilled by working agency M/s. PMPL - BRCCPL (JV) as a part of their scope of work of development of Tubewell under Jal Jeevan Mission Project of SWSM, MTL conducted a Geophysical Continuous logging in the above borehole.

Village Name	AHINDA
Block	HATGAON
District	FATEHPUR, U.P.
Drilling depth	180 MBGL
Logged Depth	172.7 MBGL
Type of Log	Continuous well logger (SP, N16 (SN), N64 (LN) & LAT)
Machine Used	IGIS
Logging Date	09.08.2023

The following aquifer zones have been deciphered with the help of logging machine.

Sr. No.	Depth Range (mtr BGL)	Thickness (mtr)	Expected Quality
1	34 - 39	5	Moderate
2	78 - 83	5	Moderate
3	114 - 119	5	Good
4	131 - 135	4	Good
5	138 - 144	6	Good

Rw - 11.4 Ohm mtr and Rm - 16.7 Ohm mtr

Note: Below 154 MBGL the formation water quality is deteriorating till log depth.
