REPORT ON GEO-PHYSICAL RESISTIVITY LOGGING OF BOREHOLE

A deep borehole was drilled by working agency M/s. GAYATRI – RAMKY (JV) as a part of their scope of work of development of Tubewell under Jal Jeewan Mission Project of SWSM, MTI conducted a Geophysical Continuous logging in the above borehole.

Village Name	Rampur chaudhari
Block	Jambo
District	Amrohi, U.P.
Logged Depth	106.4 Mtr BGL
Type of Log	Continuous well logger (SP, N16 (SN), NG1 (IN) & LAT)
Machine Used	IGIS
Logging Date	04.05.2023

The following aquifer zones have been deciphered with the help of logging machine.

Sr. No.	Depth Range (mtr BGL)	Thickness (mtr)	Expected Quality
1	18 – 22	4	Good
2	26 – 33	7	Good
3	36 – 40	4	Good
4	48 – 52	4	Good
5	63 – 68	5	Good
6	84 – 93	9	Good

BW – 15.8 Ohm mtr and Rm – 21.0 Ohm mtr

Note:- Below 101 MBGL the quality of the formation water is marginal to saline till log depth.

- Logging performed as per SWSM guidelines. For Geo-Technical Consultant,
- Groundwater quality interpreted by firm as per their logger calibration
