REPORT ON GEO-PHYSICAL RESISTIVITY LOGGING OF BOREHOLE

A deep borehole was drilled by working agency M/s. M/s. VTL- GAJA (JV) as a part of their scope of work of development of Tubewell under Jal Jeevan Mission Project of SWSM, MTL conducted a Geophysical Continuous logging in the above borehole.

Village Name	RASULABAD
Block	MUSAFIRKHANA
District	AMETHI, U.P.
Logged Depth	170.4 Mtr BGL
Type of Log	Continuous well logger (SP, N16 (SN), N64 (LN) & LAT)
Machine Used	IGIS
Logging Date	04.04.2023

The following aquifer zones have been deciphered with the help of logging machine.

Sr. No.	Depth Range (mtr BGL)	Thickness (mtr)	Expected Quality
1	23 – 30	7	Good
2	67 – 73	6	Good
3	81 – 87	6	Good

Bw – 17.07 Ohm mtr and R_{sp} – 18.10 Ohm mtr

Note: Below 87 no proper granular zones encountered till depth logged.

- Logging performed as per SWSM guideline.
- Groundwater quality interpreted by firm as per their logger calibration.
