patients in earlier life and adults will develop a condition that may be related to their earlier life experience and medical history and it may also affect their ability to respond to the underlying cause or stimulus.

THE CURRICULUM FRAMEWORK FOR SCHOOL EDUCATION
FOR CLASS XI AND XII

WHAT IS NEW IN CLASS XI AND XII
WHAT IS NEW IN CLASS XI AND XII

INTRODUCTION

Learning from class XI and beyond is essential for success in higher education. This document highlights what is new in class XI and class XII, by comparing the two documents of the National Curriculum Framework for School Education (NCFSE) for classes IX-XII. It also highlights the similarities between the two documents. The NCFSE for classes XI-XII has been developed to support the growth of students in various fields and to develop their skills and interests in different areas of learning. The document also highlights the changes in the curriculum for classes XI-XII, which have been introduced to meet the needs of students and to prepare them for higher education.

This document also highlights the changes in the curriculum for classes XI-XII, which have been introduced to meet the needs of students and to prepare them for higher education. The document also highlights the changes in the curriculum for classes XI-XII, which have been introduced to meet the needs of students and to prepare them for higher education.

This document also highlights the changes in the curriculum for classes XI-XII, which have been introduced to meet the needs of students and to prepare them for higher education.
