

Texas Dept. of Transportation
Part of the State's Highway System

Why should we return money to users of the system at other times and by other means than those we do in order to reflect their true value of the system?

**Should the new highway system become
a revenue-generating entity?**

YES OR **NO**

Under the current system there is little that can be done to generate revenue from the highway system. In fact, the state is losing revenue from the highway system. The state has lost \$1.5 billion in revenues from the highway system since 1973. This loss is due to the fact that the state has not been able to collect the amount of revenues it expects. As a result, the state must either increase the tax rate or reduce its spending on transportation. In addition, the state must also make changes to its tax structure to ensure that the revenues generated by the highway system are used effectively to maintain and improve the system. The state must also consider the impact of the highway system on local businesses and the environment. If the highway system becomes a revenue-generating entity, it will be important to ensure that the revenue is used to benefit the state and its citizens.

Yes, there are ways to make the highway system more efficient and effective. One way is to increase the use of electronic tolling and to encourage the use of electronic tolling. Another way is to encourage the use of alternative fuel vehicles. These vehicles are cleaner and more efficient than traditional gasoline-powered vehicles. They also help to reduce greenhouse gas emissions. Another way to increase efficiency is to encourage the use of hybrid vehicles. Hybrid vehicles are more fuel-efficient than traditional gasoline-powered vehicles. They also help to reduce greenhouse gas emissions. Finally, the state can encourage the use of electric vehicles. Electric vehicles are more fuel-efficient than traditional gasoline-powered vehicles. They also help to reduce greenhouse gas emissions. Overall, the state can make the highway system more efficient and effective by encouraging the use of these technologies.

What would you like to see happen in the future?

<input type="checkbox"/>	More roads built.
<input type="checkbox"/>	More bridges built.
<input type="checkbox"/>	More public transportation options available.

<input type="checkbox"/>	More emphasis on safety.
<input type="checkbox"/>	More investment in maintenance.
<input type="checkbox"/>	More focus on environmental issues.

A man in a white shirt and dark trousers stands on a raised platform, addressing a group of people seated in front of him. He is gesturing with his hands while speaking. The background features a large, colorful mural depicting a landscape with green fields, a blue sky, and a yellow sun. A banner above the mural contains text in Hindi.
