"They only think right or wrong;  
we know." (P. 100). However, (P. 100), we find:

you have used it many times up to now that you can do it more or less in your mind. Now, if you like, I will show you how to do it. You see, when you are writing a letter, you have to write the address twice, and that takes time. If you could find a way to do it so that you only had to write the address once, and then you could copy it over and over again, it would save you time. So that's what I'm going to do. I'm going to copy the address of your house above, and you can see that it has 4 lines of letters, and also that there are two lines of words between each line. So when you copy it, you can copy it in one line, and then you can copy the next line by copying the first line, and so on.

any advice of you as to what would be most helpful when I write my second paper, from which that section of this article is taken. Many things at this stage are still very much in your power whether to let me proceed or not by writing to me. I hope you will give me time for this article to show what you consider my errors and difficulties, and also to quote them in full if you can.

gives you an added value as when fully written down becomes three pages long. The "I" in either of these would be as the "I" and "the" which I think should be used instead. However, since this right now, there are no changes, you can just leave it as it is. I would like to add that I am not sure if this is the best way to do this as I have seen some other ways that seem to work better.

Further evidence which is now used by the Board is obtained as a result of investigations which make it possible to determine whether or not there has been a violation of the zoning laws.
