**Very Short Answer type questions of 100 marks of this test will be sent to
 those who have applied to appear for exam by reference to name of candidate written on
 above test papers.**

Name of Candidate: Dr. Jyoti Chavhan Roll No. 11111

Q.120

Write the name of the disease in which there is a rise in plasma protein globulin

In this disease, there is a rise in plasma protein globulin. This is due to the fact that in this disease, there is an increase in the production of globulin. This is because the liver produces more globulin than normal. This is due to the fact that in this disease, there is an increase in the production of globulin. This is because the liver produces more globulin than normal. This is due to the fact that in this disease, there is an increase in the production of globulin. This is because the liver produces more globulin than normal.

Write the name of the disease in which there is a rise in plasma protein globulin.

Write the name of the disease in which there is a rise in plasma protein globulin.

- Multiple myeloma
- Rheumatoid arthritis
- Systemic lupus erythematosus
- Sjogren's syndrome
- Sarcoidosis
